Potentiel

2-3 ans

Mise en marché

Janvier 2020

ABOUT

Convinced that a healthy and qualitative viticulture gives better quality grapes, reflecting the terroir from which they come. And, as an actor in this sector, and father of a family, it seems natural to me to participate in the preservation of our environment and to offer suitable products.

TASTING NOTES

Pale pink color with mauve reflections. Its roundness in the mouth and its balance give it a nice shine on the redcurrant with candy notes. Smooth, gourmand and tangy rosé (on raspberry and aromas of white flowers).

Ideal as an aperitif, cold meats, mixed salad ... Festive and friendly wine!

HISTORY

Organic farming promotes biodiversity, soil life. It favors more expressive and naturally less alcoholic wines. These wines with immediate pleasures, respond with modernity and simplicity to the aspirations of "consuming better".

SERVICE

Service temperature : 8°C
